*The all-time 5 kilometer road performances were run on record standard certified courses. USATF Rule 265.5 establishes the criteria for a record standard course (i.e., the course cannot drop more than 1 meter per kilometer and/or the separation in a straight line from the start to the finish cannot exceed 30% of the race distance). Note: A point-to-point course can be record standard if there is not excessive drop and if it can be verified that the wind component was not an aid on race day. Point-to-point courses like the Crescent City Classic 10K in New Orleans, Louisiana and the ING New York City Marathon are examples.
